

# ASTON MARTIN VANTAGE ZAGATO

# Supreme style, legendary performance and safety.

The Aston Martin Vantage Zagato is the supreme expression of the art of high performance.

It is a 300 kph two-seater which combines the renowned engineering of the V8 Vantage with the flair and unmistakable style of the legendary Italian designer Zagato.

The chassis is pure Aston Martin, hand-crafted by a dedicated and skilled workforce, with its well-proven, 432 bhp version of the Vantage V8 engine, now to be clothed in an aerodynamic, distinctive, aluminium body, sculpted by the world-famous Italian design-house of Zagato.

The interior too is an unmatched combination of functional British design and classic Italian style, with the occupants being cossetted by soft Italian leather and the driver guided by a comprehensive selection of instruments and supplementary information.

The performance - 300 kph, and acceleration to 100 kph in a mere five seconds - puts the Vantage Zagato firmly and unquestionably at the head of the supercar performance league. Such stunning performance and looks are allied to the renowned Vantage handling and roadholding which have been finely honed over the past seven years.

This exciting project brings together again two famous names, for Aston Martin and Zagato combined in the early 1960s to produce the highly acclaimed DB4GT Zagato. Two of these models can be seen on the right, and above them is the styling sketch of the latest Zagato-styled Aston Martin.

Just 50 Vantage Zagatos will be built, each one hand-crafted and individually tailored for its owner. Exclusivity is just one of the highlights of this car.
