LIMITED EDITION

CYRUS

The limited customization programme
for your Aston Martin DB9 / DBS

Get behind the wheel of one of the world's most spectacular vehicles

One of the most innovative chassis refinements produced by the noble manufacturer MANSORY is called CYRUS.

Alternatively, it optimizes either model DB9 or DBS made by Aston Martin. Perfect workmanship and elaborate engineering are the hallmarks of these 15 limited edition vehicles, which are in a class of their own.

CYRUS aerodynamics components are made of extremely light “prepreg autoclave carbon” and do not only include wing extensions for the front and rear, but also side skirt attachments and trims. At the front axle, a redesigned front skirt with enlarged air intakes provides optimal ventilation for the 12-cylinder power pack. The CYRUS front is visually enhanced with the newly designed carbon bonnet. With its two slotted “power domes” additional fresh air is directed into the front engine. The masculine design of the newly developed rear skirt with integrated diffuser emphasises the superior look and provides space for four stainless steel end pipes of the sonorous sport exhaust system.

Interior

The CYRUS driver will take his seat in an elaborately refined interior, which is nothing short of the exterior.

The entire modification includes a pedal system and foot rest made of aluminium as well as exquisite and lit up door sills and head rests with embroidered CYRUS logos. MANSORY enhances the interior with a set of tailor-made carbon parts for the dash board and centre console. The interior is fitted with materials of the highest quality. The perfect decorative stitching on the instrument panel and the seats is the work of a master craftsman; it provides a visual focus and completes an outstanding overall impression of the leather interior.

Fully forged & Alloy Wheels

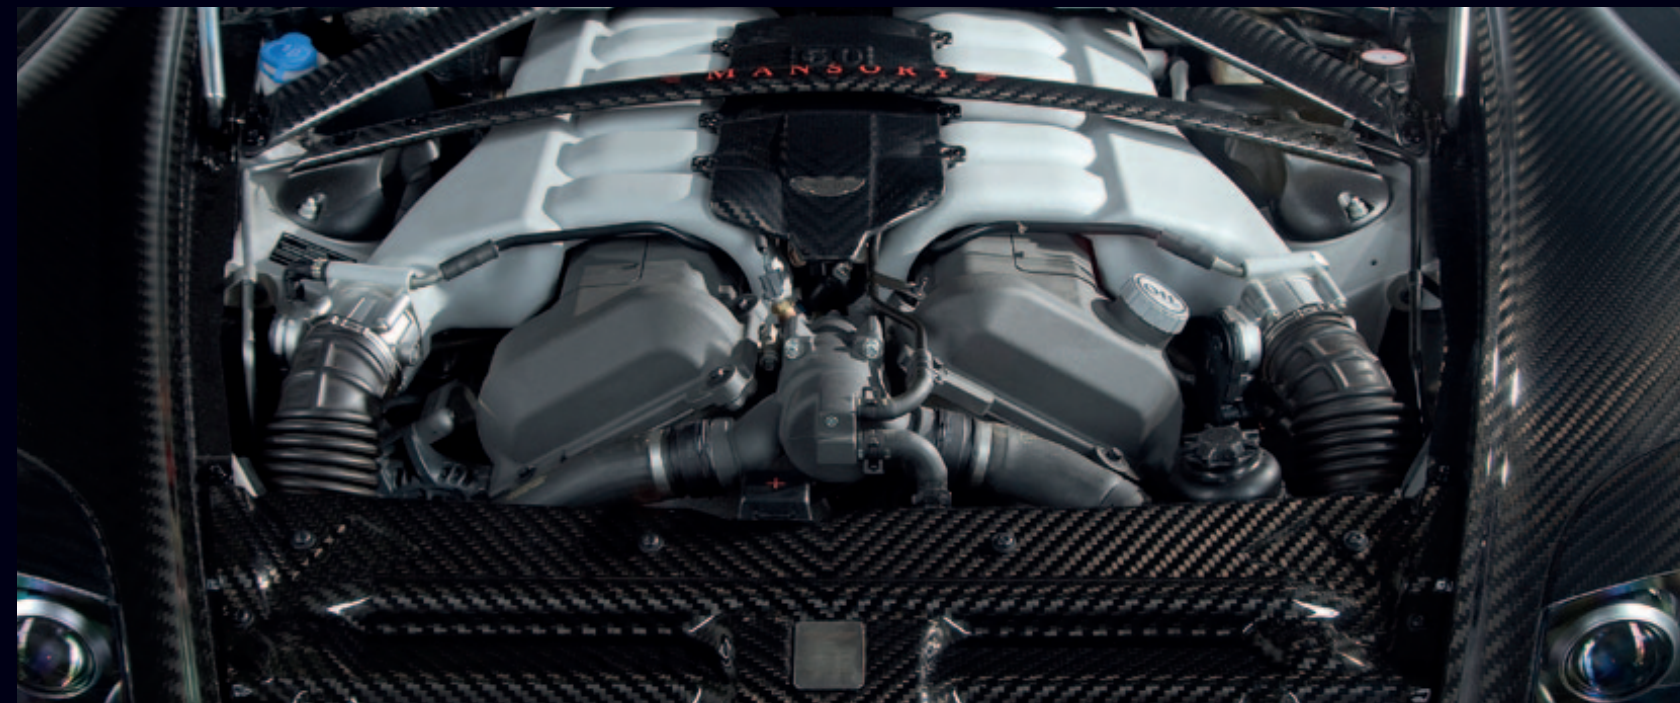

Dunlop Sport Maxx tyres, size 255/30ZR20 at the front and 295/25ZR21 at the rear, combined with 9x20 and 10.5x21 inch rims provide maximum grip with the road's surface. The design of the ultra-light forged wheel unites sportiness and elegance and perfectly fills out the wheel houses. In addition, a perfectly adjusted coilover suspension lowers the centre of gravity of this noble sports car and renders perfect road holding characteristics.

High Performance

Individually adjusted in order to meet the requirements of models DB9 and DBS, MANSORY offers a sports exhaust system with an even more powerful sound. The result of this interaction between jazzy tailpipe, sports catalytic converter, and high performance manifold is an optimized exhaust gas system and a vastly improved vehicle response, especially in the lower RPM range.

MORE THAN TRADITION, MORE THAN RACING

Company owner and namesake Kourosh Mansory and his team have been customising exclusive car brands since 1989. MANSORY stands for high-tech production combined with master craftsmanship and the finest materials. Harmoniously designed aerodynamics packages, ultra-light aluminium wheel rims and powerful engine performance upgrades form the basis of the company's technology range. Top-quality accessories and stylish interiors complete the range.
